Education & CEUs

APTA Home Health is proud to announce our new Learning Center! This intuitive platform allows members to navigate custom learning pathways, earn CEUs with virtual courses and webinars relevant to the home health PT or PTA, receive on-demand certificates, and keep track of education hours.

Advanced Competency in Home Health Certificate (ACHH)

APTA Home Health's Advanced Competency in Home Health (ACHH) Certificate is a marker of excellence in and commitment to the practice of physical therapy in the home health setting. The ACHH is offered for both PTs and PTAs providing evidenced based education that is valuable for new clinicians as well as seasoned clinicians. APTA Home Health members can save up to $550.00 on the program!

Advanced Competency in OASIS Series

OASIS, or Outcome and Assessment Information Set, is a standardized data set of questions required for all Medicare beneficiaries who are admitted to Medicare Certified HH services. It is used to determine reimbursement and outcome measures. The new OASIS-E, released January 1, 2023, poses some challenges to Home Health clinicians, and the APTA Home Health is providing exceptional training opportunities for new and current Physical Therapists practicing in the Home Health setting.
